## Cabinet group descriptions

SD	Lower Cabinet	SG	Upper Cabinet	SW	Full-Height Cabinets
Code	Description	SD	SG	SW	
FU	Cabinet with Hinged Front	x	x	x	
SZ	Cabinet with Drawers	x	-	x	
ZL	Cabinet for Sink	x	-	-	
PI	Cabinet for Oven	x	-	x	
PG	Cabinet for Stove Top	x	-	-	
NS	Cabinet for Blind Corner	x	x	-	
NA	Cabinet with Double Hinged Front	x	x	-	
DI	Cabinet with Angled Front	x	x	-	
CA	Cabinet, Cargo	x	-	x	
OT	Cabinet, Open	x	-	x	
KL	Cabinet with Angled Front	-	x	-	
OC	Cabinet, Drain	-	x	-	
OK	Cabinet, Wetsink	-	x	-	
MI	Cabinet for Microwave Oven	-	x	-	
CO	Cabinet, Combo (Oven + Microwave)	-	-	x	
LO	Cabinet, Refrigerator	-	-	x	

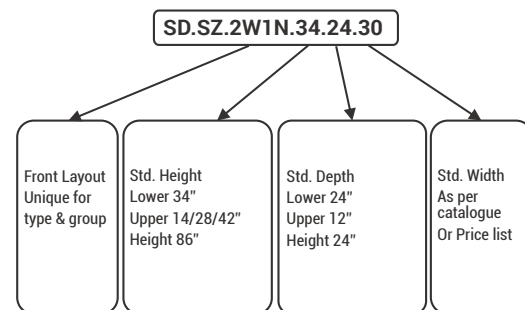

## Examples of front layouts

Code	Description
1FU	1 Hinged Front (RH or LH)
2FU	2 Hinged Front (R or L)
1FU+1N	1 Hinged Front (R or L) & Short Drawer
2FU+1N	2 Hinged Front (R or L) & Short Drawer
1W	1 Tall Drawer
2W	2 Tall Drawer
2W1N	2 Tall Drawers + 1 Short Drawer
1W2N	1 Tall Drawer + 2 Short Drawers
1W3N	1 Tall Drawer + 3 Short Drawers
4N	4 Short Drawers
5N	5 Short Drawers
1FU+B	1 Hinged Front (R or L) & False Front
2FU+B	2 Hinged Front (R or L) & False Front
C	Cargo
1FL	1 Bifold Front (R or L) + False Front
1KL	2 Chest-Style
1FU+1KL	1 Hinged Front (R or L) & 1 Chest-Front

## Description of index

Groupings	Type	Group	Layout	Height	Depth	Width
Example	SD	SZ	2W1N	34	24	30
Explanation	Lower Cabinet	Drawers	2 Tall 1 Short	34"	24"	30"

Index components are separated as follows:

## GENERAL INFORMATION 2/2

## STOCK

Stock annotation	Cabinet Nr.	Element Abbrev.	Additional Annotation
E.g.	S4	BL	felc + perf CNC
Description	Cabinet Nr. On order	Abbrev. as standard	Additional Service or non-standard

Description of codes join with symbol "-"

S4 - BL - felc + perf CNC

Cabinet numbering system:

1. The cabinets are numbered in accordance with the numbering on order form (template available on the website).
2. If there are more cabinets with the same index number (such as several that are the same), add ".NR" to the number, where "NR" stands for a number starting from 1, eg "S4.1" followed by "S4.2" etc.
3. No numbering continuity is required so you can keep the numbering of the cabinets according to the individual design, e.g. S1 -> S2 -> S4, where no.3 may be e.g. a dishwasher.

Code description of elements:

1. If there are more than 1 element of a given type, to each element we add the ending "\_NR", where "NR" stands for a number starting with 1, e.g. "WS\_1" or "PL\_HDF\_2".
2. Upper case will be kept for better reading.
3. Custom items will be marked with their full name.

Additional annotations:

1. The services included in the price list have an annotation standard.
2. Non-standard services will be described individually.
3. If the description of the service does not allow for a uniform interpretation, drawing and annotation "acc. to FIG."

Example of standard barcode annotations:

## BARCODE TAG SYMBOLS

lp.	Type	Material	Name
1	Left side	Panel 18 #	BL
2	Right side	Panel 18 #	BP
3	Bottom	Panel 18 #	WD panel
4	Center	Panel 18 #	WS
5	Top panel	Panel 18 #	WG

32	Back of drawer	Disc 16 #	SZ_ty

## INTERNAL DRILLING OF CABINETS

Examples of developed drillings in accordance with manufacturers' recommendations:

Internal drilling:

1. All drilling is done on a precision CNC machine.
2. The drilling accuracy is approximately 0.2 mm.
3. CNC programs are generated by an advanced technological software that was created by Komandor.
4. Drilling pattern templates from leading hardware manufacturers are used in the kitchen accessories database.
5. The database of the program along with the drilling technology is state of the art and regularly updated.
