LUMI glass wall and door system

LUMI fixed screens

Are you looking for a stylish solution to divide open space or partition rooms? The LUMI system by KOMANDOR has been extremely well received by the interior design community since its introduction at the Interior Design Show and is being specified in more and more projects in the city.

LUMI is an aluminum framed interior glazing system that can be fitted in different configurations and accepts a host of insert material, glass, panel, mirror and more. Systems are custom made to your specific opening at our factory in Mississauga and installed by our technicians.

Aurora glazing system for office buildouts

Aurora glazing system for residential

The Aurora partition system allows you to divide a large open space into rooms, corridors or office space by building walls out of aluminum and glass. A favored product by architects, Aurora allows the creation of these partitions walls while maintaining privacy and light transmission if necessary.

The Aurora line of products provides a custom solution that is cost effective because there is no need to frame or drywall additional bulkheads or walls in preparation of installing this system. The panels are manufactured in our factory and simply fastened to each other and structurally secured within the room. The process is quick and easy.

TAW 1 single glaze partition system

TAW 2 double glaze partition system

The TAW partition systems offers a more seamless aesthetic with the use of frameless glass panels. Create offices and boardroom spaces with frameless glass partitions.

The TAW systems can accommodate different thicknesses of glass and are available as a single or double glazed set-up.
